

a world leader in Forestry Certification

International Organisation for Standardisation's ISO 14001 is a globally respected reference in relation to Environmental Management System implementation and performance. Gunns Limited was Australia's first forestry company to achieve this certification.

AFS/01-31-01

The Australian Forestry Standard (AFS) is the national benchmark for independent verification of environmental, economic and social sustainability in forest management. Gunns Limited was the first to achieve this standard.

PEFC/21-31-01

The Australian Forest Certification Scheme is mutually recognised under the Programme for the Endorsement of Forest Certification schemes (PEFC), the world's largest sustainability recognition framework. This demonstrates that the AFS meets the highest international forest management standards.

Promoting Sustainable Forest Management

The Chain of Custody Standard is the national benchmark for independent verification to guarantee a trace back system from the finished product to the forest. This ensures products from Gunns Limited originate from sustainably managed AFS and PEFC certified forests.

Gunns Limited's certification credentials are independently verified and audited by renowned Norwegian firm Det Norske Veritas (DNV) to ensure ongoing compliance and continuous improvement. DNV is accredited as a certification body under the processes of Joint Accreditation Systems of Australia and New Zealand (JAS-ANZ) to ensure credibility and transparency in the certification process.
